

AI + LLM App Development Bootcamp

AI for Business + Development of LLM Apps

Practical Tips for Successfully Studying this Program

Contents from our in-person master program

- For each lesson:
 - We will present the general outline of the lesson in the video.
 - We will give you material to complete the study on your own.
 - In the practical lessons, we will give you solved exercises for you to repeat them and practice.
 - Repeat until you master the lesson.
- This is a Bootcamp:
 - Your commitment is key.

Two parts, two learning systems

- As you know, this program has two parts: Artificial Intelligence and LLM Application Development.
- Learning the first part is easy, just listen to the lessons and read the included books. To better retain the main concepts of this part, we recommend making summaries and diagrams.
- Learning the second part is also easy, but requires a different approach: practice, practice, and practice. To better retain the main concepts of this part, we recommend repeating the exercises and studying the support material as many times as necessary until you are fluent with them. You don't learn to program if you don't program.

Keys to success

- Each student has their own pace and favorite study system, the important thing is that they work.
- The key to making the most of an online course is the student's self-discipline. Finding the necessary time to study and practice, and being persistent until the end of the program.
- Some students find it helpful to share on their social networks that they have started the program and what they are learning along the way, as making it public increases their level of commitment.
- Coaching sessions can be very helpful for many students. If you think they could also be useful for you, contact the instructor to book coaching sessions.

Required equipment: Screen Size

- We have prepared the videos so they can be watched on every screen (mobile, tablet, laptop, desktop computer).
- In the second part of the program, we may present documents that look small on your screen. Do not worry about it, because you will always have the option to download the document and view it in full screen.
