

LLM Apps

Do it yourself or hire a professional?

Do it yourself or hire a professional?

- Huge potential.
- Complex issues.
 - Use of tokens and costs.
 - Limits of the Context Window.
 - Security of private data.
 - Misalignment: unwanted content.
 - Security: injections, leaks, jailbreaking.
 - Inference latency (speed vs cost).
 - Multiple data sources.
 - Open Source Models.
 - The problem of lack of reproducibility.
 - Hallucinations.
 - The problem of outdated data.
 - A different evaluation.
 - Prompts.

Alternatives

- Learn and create the LLM Application yourself.
- Hire external professionals to create the LLM Application.
- A combination of the previous two.
 - The company provides the knowledge about its system and its sector.
 - The consultancy provides the technical knowledge about LLM Applications.
