

LLM Apps

What are tokens?

Tokens are like the atoms of LLMs

- ChatGPT has been trained with the text equivalent to 10 million books.
 - 800,000,000,000 words
 - 1,100,000,000,000 tokens
- A token is typically a small part of a word.
- Multiple tokens form a sequence. All sequences of an LLM make up a vocabulary.
