

Hello

John Smith

📍 New York, NY • 📞 (123) 456-7890 • ✉️ john.smith@email.com • 🌐 github.com/johnsmithdev • [linkedin.com/in/johnsmithdev](https://www.linkedin.com/in/johnsmithdev)

Summary

Detail-oriented and innovative **Full-Stack Developer** with over **5 years of experience** building scalable web applications and APIs. Passionate about clean code, modern JavaScript frameworks, and backend performance. Strong communicator and team collaborator with a focus on delivering high-quality software that solves real-world problems.

Experience

Senior Software Engineer

TechNova Inc., New York, NY

Jan 2022 - Present

- Led the development of a microservices-based architecture for a SaaS product used by 50,000+ users.
- Developed reusable front-end components using **React + TypeScript**, reducing code duplication by 30%.
- Designed and deployed REST APIs using **Node.js** and **Express**, improving API response time by 45%.
- Collaborated with product managers and UX designers in agile sprints to deliver 20+ features on time.
- Introduced automated testing with **Jest** and **GitHub Actions**, reducing bugs in production by 60%.

Full-Stack Developer

CodeForge Labs, Remote

Jun 2019 - Dec 2021

- Built and maintained a web application using **Django** and **React**, supporting over 100,000 monthly users.
- Migrated monolithic architecture to **Dockerized** services, reducing deployment time by 50%.
- Integrated **Stripe API** for payment processing and created secure authentication with **JWT**.
- Wrote technical documentation and mentored 3 junior developers.
- Utilized **PostgreSQL** and implemented database optimization strategies to enhance performance.

Junior Web Developer (Intern)

BrightApps Solutions, Boston, MA

Jan 2019 - May 2019

- Assisted in creating landing pages and internal dashboards using **HTML**, **CSS**, and **JavaScript**.
- Collaborated on fixing front-end bugs and testing new features.
- Gained hands-on experience with **Git**, **Bootstrap**, and **API integration**.

Education

B.S. in Computer Science

Boston University, Boston, MA

Graduated: 2018

- GPA: 3.75 / 4.0
- Dean's List (2016–2018)
- Final project: "AI-Powered Chatbot for Campus Services" (Python, TensorFlow)

Certifications

- AWS Certified Developer - Associate (2023)
- JavaScript Algorithms and Data Structures - freeCodeCamp (2022)
- Full-Stack Web Development with React - Coursera (2021)

Projects

DevTrack - Project Management App

- Full-stack tool for teams to manage tasks and sprints (React + Node + MongoDB).
- Features: Drag-and-drop Kanban board, team chat, notifications, and user roles.

RecipeFinder - AI-Powered Recipe Generator

- Built with Python + OpenAI API + Flask.
- Users input ingredients, and it suggests recipes based on machine learning.
