

Node.js Installation Guide

For macOS:

1. **Go to the official Node.js website** 🖱️ <https://nodejs.org>
2. **Download the LTS (Recommended) macOS Installer**
 - Click the green "LTS" button
 - This gives you a `.pkg` installer for macOS
3. **Run the installer**
 - Double-click the `.pkg` file and follow the steps
4. **Verify installation** (in Terminal):

```
node -v  
npm -v  
npx -v
```

For Windows:

1. **Go to the official Node.js website** 🖱️ <https://nodejs.org>
2. **Download the LTS (Recommended) Windows Installer**
 - Click the green "LTS" button
 - This gives you a `.msi` installer for Windows
3. **Run the installer**
 - Double-click the `.msi` file and follow the installation wizard
 - Make sure to check "Add to PATH" during installation
4. **Verify installation** (in Command Prompt or PowerShell):

```
node -v  
npm -v  
npx -v
```

Expected Output

You should see versions like:

```
v20.x.x  
10.x.x  
10.x.x
```
